20 ANNI DI ESPERIENZA IN EUROPA E NON SOLO

Teknometal nasce nel 2014, sulla base di una ventennale esperienza maturata nel settore delle grandi opere e dei montaggi.

Siamo specializzati nella realizzazione di progetti in cui la costruzione di strutture e installazioni esige una posa complessa e diversificata.

In queste pagine presentiamo, per immagini, una selezione delle nostre attività recenti, buona parte delle quali realizzate in Francia. Sono montaggi di varia dimensione e tipologia: dal grande cantiere al piccolo fabbricato, grossa e piccola carpenteria metallica, solai collaboranti e rivestimenti di facciata in acciaio, materiali plastici e alluminio.

20 ANS D'EXPÉRIENCE EN EUROPE ET AU-DELÀ.

Teknometal a été fondée en 2014, sur la base d'une solide expérience de vingt ans dans le domaine des grands travaux et du montage.

Nous sommes spécialisés dans la réalisation de projets où la construction de structures et d'installations exige une pose complexe et diversifiée.

Dans les pages qui suivent, nous présentons, par images, une sélection de nos activités récentes, une bonne partie d'entre elles ayant été réalisées en France. Il s'agit de montages variés en termes de dimension et de typologie : du grand chantier au petit, de la grosse à la petite charpente métallique, bacs collaborants, bardages et systèmes de façade en acier, matériaux plastiques et autres.

20 YEARS OF EXPERIENCE IN EUROPE AND BEYOND

Teknometal was founded in 2014, based on 20 years of experience in the field of large-scale works and assembly.

We are specialised in the realisation of projects where the construction of structures and installations is complex and diverse.

They are assemblies of various sizes and types: from large construction sites to small buildings, large and small metal carpentry, collaborating floors and façade cladding in steel, plastics and aluminium.
